## IEPA PRE-CONGRESS WORKSHOPS

June 22<sup>nd</sup> 2022

- CBT for the early stages of psychosis
- Supporting families and carers in the early phase of psychosis
- Initial treatment for psychosis: What are the main targets, and how can we face the greatest challenges
- Managing antipsychotic discontinuation

## INVITED SYMPOSIA

June 23<sup>rd</sup> – 25<sup>th</sup>, 2022

1. IEPA Symposium: Intervention strategies for supporting people in the early stages of psychosis
2. Early onset mood disorders: under-recognised and under-treated?
3. Novel evidence-based approaches to dementia prevention
4. Decreasing or stopping antipsychotics: a neglected topic?
5. How do environmental and genetic risk factors shape the vulnerability for psychotic disorders?
6. Ethics and personal meaning in patients with early onset psychosis
7. ADHD: life-time continuity, serious mental illness, and genetics
8. Early Intervention in Psychosis: From promise to delivery and beyond

## KEYNOTE LECTURES

June 23<sup>rd</sup> – 25<sup>th</sup>, 2022

1. Early Intervention in low-resource settings: luxury or necessity?  
*by Swaran P. Singh*
2. What is the effectiveness of early intervention services for people with psychosis  
*by Christoph Correll*
3. Predictive data science in clinical application in mental health: where do we stand and where do we go from here?  
*by Nikolaos Koutsouleris*
4. Early intervention psychosis and beyond  
*by Patrick McGorry*
5. Appreciating the complexity of psychosis as a target of prevention  
*by Jim van Os*
6. The pharmacological treatment of schizophrenia: how far have we come?  
*by John Kane*
7. Technological Addictions: The New Frontier in Addiction Psychiatry from Technology Natives to Technology Immigrants  
*by Petros Levounis*
8. A public health approach to the prevention of psychosis  
*by Robin Murray*
